Research and Studies

ABSTRACT

These interactive workshops focus on utilizing digital tools to empower individuals with ASD, their families, and professionals. Participants will gain hands on experience with the Itkalem application for non verbal communication and the Itqadem platform which offers diagnostic tools, tailored surveys, and diverse resources. Through practical demonstrations, attendees will learn how to integrate these tools into daily routines, facilitating learning, communication, and improved outcomes for individuals with ASD. This initiative aims to bridge the gap between cutting edge technology and the unique needs of the autism community.
